

## Tutorial on joining the MPI 2021 team – Supplement (What can go wrong and how to cope )

**(1)** If you are joining using the Steps of **Section 1** and if you have used Teams before (and **especially** if you participated in the MPI-2020 workshop), you may receive a screen like the one below. In the place where the white rectangle is in the upper-right corner, you will see the name of your University. Change it to the University of Vermont.

**(2)** If you are joining using the Steps of **Section 2** (i.e., your University does not subscribe to MS Teams), you may discover that even though in the Microsoft sign-in windows you enter your personal Microsoft account password, you seem to keep getting into your University account. This likely occurs if your computer's setting automatically log you into all Microsoft applications with your University account. You will then need to find that setting and disable it.
